

What is it?

FUSE is a fun, relaxed, interactive club that uses computers, hi-tech materials, and your creativity to explore technology, science and engineering.

How does it work?

- Provides challenges that can be tackled individually or in groups.
- Each challenge has levels, just like video gaming, so you can continue to move up to higher levels or you can venture into different activities that might interest you.
- Nearly 20 challenges in areas such as robotics, electronics, biotechnology, graphic design, app development, 3D printing and more.
- Go beyond the challenges to apply the concepts to your life! Create, engineer, problem solve your own challenge!

When does it meet?

- Meets every Monday and Thursday
- First club meeting date: Monday, January 17
 - Complete session dates:
Monday, January 17- Monday, March 21, (17 meetings in total)

Who do I ask if I have questions?

Mr. Evans - michaelevans@sd54.org

How do I sign up?

Fill in the following packet and turn into your science teacher or the office
(Mr. Evans - Room 107)

NAME _____ GRADE _____

PLEASE LIST YOUR OTHER WINTER AFTER-SCHOOL ACTIVITIES:

PLEASE RETURN ALL 3 SIGNATURE PAGES.
