M. Scott Ross, Principal
Alissa Carey, Assistant Principal

Dear Parent/Guardian:

Congratulations! Your son or daughter has been invited to join the **"Science Seekers Lab" club**. We will be meeting throughout the year to conduct various experiments that were conducted in the 7th grade science classroom. **IMPORTANT NOTE: THIS CLUB IS FOR 8TH GRADERS ONLY.** We want to provide the lab experiences for those that were not able to experience them last year. If you cannot make it to all sessions that is ok but you will be required to reserve your spot each session by filling out the google form listed below. Students will meet after school at various times throughout the school year up until February. We will be working with the following equipment:

- temperature probes
- glassware including graduated cylinders and beakers
- bunsen burners
- electric scales and various chemicals
- microscopes

All experiments will be centered around chemistry and biology in this club.

Dates are periodic so please keep an eye and ear out in announcements for when we will be meeting.

*** Due to limited lab space and equipment we will be accepting the first 25 permission slips that are filled out for this club. Please fill out your digital permission slip ASAP to reserve you spot in the club.

Our first meeting will be Monday September 13th in room 109 from 2:15-4:00!

Thanks,

Tom Pfeifer
7th Grade Science and
Magnet Science Teacher
